Argentina : Fontana inaugurated the summer season at the municipal pool

12/01/2021

Financing allowed the construction of the masonry machine room, which has since been carried out, divided into two spaces, one for the pumps and motors, and the other for the boilers. A general board and two sectional boards were also installed. The pool's hydraulic system was also put into operation, as well as the installation of rotationally molded purifying filters, as well as the installation and provision of two spy pumps. (Translated from Spanish)
