Rotomolding Market News - Europe

Monistrol-sur-Loire, France: local job seekers had the opportunity to discover plastic molding thanks to the Employment Trailer

Rotational molding, extrusion, blow molding, injection molding... Multiple job seekers has the opportunity to discover the transformation techniques used by molders. The event was a part of the Plastics Industry Week organized by Polyvia, the french trade organization for plastic molders. People could visit Atec's production hall and Puxi Lab', a truck equipped with any machine you can find at a plastics molder's production site. (Translated from French)

Salvador Dali, a designer seen through three of his most iconic furniture models

19/03/2021

Why should one keep editing furnished imagined by Salvador Dalí in 2021 ? According to Ramon Ubedà, BD Barcelona's Artistic Director, the answer is actually quite clear : "those are artistic creations and art tends to live longer than a washing machine, even a well designed one". In the brand's showroom, visitors can discover Dalí's face: his eyes become paintings, his nose is a fireplace and his mouth... is a new version of the sofa he designed before the war. 300 "Salivas" sofas were produced in the 1970s by BD Barcelona. It can be taken outside since 2004 as it has been redesigned to be rotationally molded with polyethylene. (Translated from French)

The Reason Behind Resin

With several baggage carts on the market made of steel, ground service providers are often working with a heavy material that can corrode when exposed to the elements. Because ground handlers and airlines must be able to rely on their equipment in a variety of climates and companies are looking for ways to reduce their overall carbon footprint, FAST Global Solutions sought a way to replace heavy steel carts that require a high amount of fuel use during towing. With a rotomolded body, FAST Global Solutions' AlphaCart offers a lightweight baggage cart solution designed to outsmart the elements.

Kayak surge: Versatile craft perfect for exploring state

21/03/2021

Ascending in quality, you will find brands like Perception, Ocean Kayak and Ascend. They cost from \$500-\$1,000, depending on hull design and options. This price range will give you a roto-molded hull that's made of thicker, tougher material than entry level boats. You also get a better, more comfortable seat, adjustable foot pegs and dedicated deck compartments for tackleboxes and soft-side coolers. They also have interior storage areas with sealed hatches and paddle holders. Hatch seals vary widely in design and quality. Watertightness varies dramatically.
