## Rotomolding Market News - North America

---

### **Persico Group elected as ABB Value Provider**

On June 23, Persico Group, an Italian multinational engaged in the automotive, industrial and machine industries, and an ABB partner for over 15 years, has been officially recognized as ABB Value Provider. During many years of collaboration, the two companies have developed robotized solutions featuring advanced technology for the automotive industry and beyond. In 2018, at the ABB Value Provider Conference, Persico Group received a prize for the most innovative robotic application. Persico Group is focusing on automation and the deployment of robotics in its reference industries; therefore, following a period of joint operations and training, they have obtained the certification of ABB Value Provider, celebrated with an official ceremony at their headquarter in Nembro.

### **IDEM welcomes three new members to the Indiana Partners for Pollution Prevention**

The Indiana Partners for Pollution Prevention (Partners) inducted three new members at its Quarterly Meeting held on June 30, 2021. This meeting was virtual because of COVID-19 precautions. As members, each organization pledges to implement voluntary environmental initiatives at its facility, share information and expertise with other businesses, foster environmental stewardship among its employees, and help raise public awareness. Among these three new members, Elkhart Plastics, Inc. (EPI) is a privately held American company which manufactures rotationally molded plastic parts and are one of the largest custom rotational molding companies in the United States. Elkhart Plastics LLC has three (3) Indiana facilities. The first two, South Bend and Elkhart, were inducted in 2020 and with the induction of the Middlebury plant, Elkhart Plastics LLC is now a corporate Partners member.

### **ROTO-MSB acquires a new oven for rotational molding**

13/07/2021

Located in Bas-Saint-Laurent (Quebec), the company ROTO-MSB, which manufactures plastic parts by rotational molding and proposes subcontracting services, has just increased its production capacity with the purchase of a new oven. The addition of state-of-the-art equipment allows the company to be very competitive in the market. Rotational molding has several advantages: a low cost compared to injection

molding; the manufacturing of large and small parts, simple or complex; several possible surface finishes; a very wide range of colors; control of wall thickness; and the possibility of additions (inserts, threads, engraving). (article in French)
