CEEVO attended the ERPRO DAY in the premises of the company Erpro Group, in Saint-Leu-la-Forêt

CEEVO, the Development and Attractiveness of the Territories of Val-d'Oise Agency, took part, this Thursday, at the invitation of its leader, Cyrille Vue, in the ERPRO DAY organized in the industrial premises of the company Erpro Group, in Saint-Leu-la-Forêt. ERPRO specializes in 3D printing, the manufacture of prototypes and pre-series and large series manufacturing.

ERPRO took the opportunity to present its know-how and technological skills. The group offers a full range of services for additive manufacturing and the finishing of its customers' projects, relying on the mastery of different 3D printing technologies as well as machining, silicone molding, RIM molding, rotational molding, injection molding, paint finish and chrome paint. Erpro Group thus intervenes from design to post production for the realization of 3D printing projects, by offering parametric design, topological optimization, metal coating or paint finishing services. MCI Mobilier and GMI create a rotomolded bed that discourages bedbugs

20/10/2021

The company MCI Mobilier has designed, with its neighbor and industrial partner GMI, a bed base that is made of high density polyethylene. This new bed base limits to the maximum the niches and interstices where insects could settle. And if it cannot guarantee their total absence, its material can be cleaned without damage. Snap One adds bass to outdoor areas with Episode Terrain hardscape sub

Snap One has unveiled a new outdoor subwoofer to give customers more choice and flexibility when adding bass to outdoor areas where direct burial is not possible or desired. Adding to Episode's Terrain lineup, which includes a direct-burial subwoofer, the new Episode Terrain hardscape above-ground subwoofer is an 8" floor-standing subwoofer equipped with an oversized 1.5" dual-voice coil designed to bring high-performance bass to outdoor areas such as patios and decks. The rotomolded cabinet is tested to IPx5 weather proofing standards to ensure it withstands rain, snow and sprinklers to be enjoyed throughout the year. It can be powered by a standard multi-channel or 2-channel amplifier and is compatible with third-party amplifiers and satellite speakers, making it simple to add to existing outdoor audio systems. The subwoofer includes mounting holes and comes with a 3-foot wiring tail for secure, waterproof installation.

Garonne's Economy Awards : Rotomod's kayaks surf the wave

The Bon-Encontre based company has been able to turn the tide after the Covid crisis and its latest boat, the Hiro, is boosting its recently diversified production. The oars, or rather the paddles, had to be taken out to stabilize the Rotomod ship through this health storm. But Rotomod did not go down, despite a drop in production and the partial closure of the borders while the quarantine measures were being held in France. This rotomolded kayak specialist has found a good cruising pace with the Hiro, one of its leading products, but also because its managers opted for diversification. (Translated from French)
