#### **GMI : a strong commitment to the circular economy**

01/03/2022

Groupe GMI, a France-based rotomolder, strongly believes that tomorrow's economic system must be built upon the notion of sustainability by lessening its activities' environmental impact. The circular economy has been a priority line of work for GMI, especially regarding eco-design, reuse, recyclability, investment and sustainable projects. (Translated from French)

#### **New extensions for the Ecoflo biofilter**

The Product Development and Improvement team of Premier Tech's French site has carried out development work to improve the extensions used in the company's Ecoflo biofilters. The result of this research and development is the creation of new rotomolded extensions D400 and 1200x800, more adapted to the field constraints and 100% made in France. (Translated from French)

#### **Porto-Vecchio : la noix de coco s'invite dans les jardins de l'hôtel Casadelmar**

10/03/2022

La direction de l'hôtel Casadelmar, à Porto-Vecchio a opté pour la mise en place d'une station d'assainissement Ecoflo, qui utilise une nouvelle technique : la filtration avec des fragments de noix de coco. Pour ce faire, elle a réuni deux entreprises locales pour sa conception, la Société insulaire de rotomoulage qui a son usine au sein de la zone artisanale de Figari, et l'entreprise Avec, spécialisée dans l'assainissement, pour la réalisation.

### **Installation of a sewage treatment plant in the gardens of the Casadelmar hotel**

10/03/2022

The Casadelmar Hotel in Porto-Vecchio, in Corsica, and its prestigious table are often cited as an example of excellence, but it is in another area that the establishment also aims at excellence: the environment.. The management has opted for the installation of an Ecoflo sewage treatment plant, which uses a new technique: filtration with coconut fragments. . To do this, the project brought together two local companies for its design, the Société insulaire de rotomoulage, which has its factory in the artisanal zone of Figari, and the company Avec, specialized in sanitation, for the realization. (Translated from French)

### **Using Rotomolded Panels to Create a Modular, Easy-to-Assemble Structure**

Here's an interesting concept for a modular structure, though I'm not sure where it fits within the marketplace of easy-to-assemble buildings: Camping? Disaster relief? Temporary housing? Living quarters for remote workers? In any case, the \$7,500 Quick Cabin is a 10x10 structure composed largely of modular rotomolded panels, each weighing 21 pounds.
