Whaly 400 and 500 test: ultra-strong rotomolded boats

This article is about the test of the Whaly 500 R80 and Whaly 400 rotomolded boats (the latest in the range), which are imported into France by the Passion Nautic Club shipyard in Arzon, Morbihan. The Whaly brand was created in the 1970s in the Netherlands. Long confined to professional use, these boats have since found their audience with more family-oriented sailing programs. Today, the range consists of ten models, from 2 meters to around 5 meters for the largest. Their arrival in France is more recent and dates back to 2018. (Translated from French)

American Expedition Vehicles Jeep Wrangler JL Front Bumper Review

12/07/2022

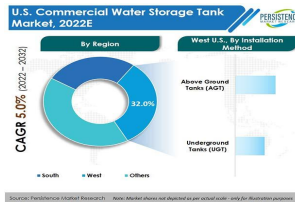

American Expedition Vehicles is the go-to brand when it comes to premium OE-quality parts and accessories for your Jeep, Ram, or Chevy. The EX full-width bumper offers maximum protection but gives up almost nothing to the RX in terms of clearance. Both bumpers sit higher and tighter to the grille than stock for enhanced ground clearance, and offer a greater approach angle over stock for either JL Wranglers or JT Gladiators. Because AEV bumpers are designed by enthusiasts and tested on the trail, they are loaded with innovative features intended to make them peerless in real-world situations. Such elements include a lightweight roto-molded hoop with a hidden structure that can support two of AEV's 7000-Series lights, hides any light wiring, and has provisions to mount the front trail camera.

The U.S. Commercial Water Storage Tank Market is projected

12/07/2022

The U.S. commercial water storage tank market is anticipated to witness a growth rate of 5% from 2022 to 2032. Market expansion is predicted to be driven by increasing commercial water storage tank usage in wastewater treatment facilities, such as the oil & gas industry for the storage of slurry and other wastewater and fresh water. Above-ground water storage tanks are becoming increasingly common. The primary reason for the surge in above-ground water storage tank demand is their lower installation costs.

'A 20-year startup': Nationally known boat company anchored in Steamboat Springs

In a small workshop just off 13th Street near downtown Steamboat Springs, John St. John puts his brand on the side of skiff boats bearing the Hog Island Boat Works name. For two decades, the Steamboat Springs man has created some of the most respected drift boats and skiffs in the country. Hog Island Boat Works is the only manufacturer in the United States that creates skiff and drift boats out of roto-molded plastic. The business currently offers its boats at six dealers across the country.
