ARMO'S ROTATIONAL MOLDING NEWSLETTER

jeudi 8 septembre 2022

Events

ARMA ROTOMOULD 2022 Melbourne, Australia - 18-20 September 2022

It has been three years since we all gathered for a Rotomould conference, and no one would have foreseen what change was to come or how our industry would have thrived throughout the challenges when we were all last together in 2019. ARMA and its Board of Directors are excited to be planning a conference again in September and from recent conversations it seems the urge to reconnect extends industry wide.

Research & Patents

Experimental study of small plastics products using roto molding model

Small product of roto molding process is not an economically competitive way to produce hollow plastic materials such as blow molding process, hence the study of parameters of small products is very important for design techniques, in this study

parameters such as percentage of plastic powder conversion into final product, product thickness and rotational speeds Using a cylindrical mold (diameter = 61, height = 111 mm) and an experimental model of the rotational molding process.
