Simop launches the industrialization of its runoff water treatment system

19/09/2022

The French company Simop has just launched the production of Trithon to clean up run-off water from car wrecks, parking lots, but also coastal, airport or port areas. A manufacturing which takes place in Ham in one of the four factories of the company based in Sainte-Mère-Eglise, in Normandy. Thanks to the support of Bpifrance, the French public investment bank, the production and marketing of Trithon began in September at the Ham plant. (Translated from French)
