### **Maker Faire Rome 2022 : here are Tor Vergata's eight projects**

The University of Rome "Tor Vergata" presents 8 projects combining science, technology and innovation to spread the culture of open innovation at the fair. The T.Y.R.E.C.S project (the smart buoy) consists, as its name suggests, in the manufacture of a marine buoy capable of cleaning the surface of the sea from oils, fuel residues and other liquid organic substances. It is manufactured by rotational molding with a unique and easily recognizable design to precisely define the waterline and guarantee the typical shockproof characteristics.
