Dear Bills : incentives lie in the paychecks for workers

26/12/2022

Motivating employees, particularly in the context of the energy crisis, is fundamental. That is why the hundred people who work at Zincogam Spa and Giurgola srl will receive an additional 300 euros - free of tax - on their December salary. In its memo, the company summarizes what has been done recently. 2 million euros were invested in 2021 in the maintenance of the hangars where work is being done on the

production of polyethylene tanks and "the new rotational molding plant will make it possible to achieve polyethylene tank capacities of up to 10,000 liters in a single block". (Article in Italian)

Rotomolding Market News - North America

Cascade plant relies on high-tech machines to create parts

18/12/2022

Centro Inc. opened its rotational molding facility in Cascade, Iowa, in October 2021, one of 10 of the North Liberty, Iowa-based company's manufacturing sites across the U.S. and Brazil. The two Rotalign machines at the Cascade site make pieces for Deere & Co. and Honeywell. Some of the items made at the site include hoppers and fertilizer tanks for Deere & Co. and industrial eye wash stations for Honeywell.

Brunswick launches Veer - new boat brand for electric propulsion

04/01/2023

Today at the Consumer Electronics Show (CES) in Las Vegas, Brunswick Corporation launched Veer, an all-new boat brand designed to support electric propulsion and appeal to the next generation of boaters. The first Veer model to be revealed is the X13, a 13-foot, multi-tool vessel built from rotomolded polyethylene. If you are not sure what rotomolding is, think of those polyethylene kayaks, which are one of the most common boats made with the process. It makes for a very durable boat.
