Roto molded pallet

A pallet assembly includes a support assembly and a base assembly. The support assembly has a deck molded from a plastic shell material and male fittings that extend away from a lower surface of said deck. The base assembly includes a stringer that defines a plurality of openings which extend through the entirety of the stringer.

ROTATIONAL MOULDING TOOL

The invention relates to a rotational moulding tool for the primary shaping of hollow bodies, said tool comprising two mould halves (12a, 12b) which, in a position of use, are placed against one another so as to define a moulding chamber with mould half openings which face one another and which are framed by annular flange sections (13a, 13b) extending in a flange peripheral direction (14) around a main axis (15).

Rotomoulded planters win Wallpaper Design Awards

Vondom is off to a good start this year, having won the Wallpaper Design Awards in the Best Outdoor Lounge category with Gatsby Planter designed by Ramón Esteve. The Gatsby planters have a design that reproduces the shape and feel of etched glass, making them avant-garde design planters capable of embellishing gardens or any other outdoor space, as well as indoor spaces. Vondom manufactures these planters using the rotomoulding technique, which is why these pots can have light inside them and also function as lamps. (Translated from Spanish)

Leaffield Environmental announces new Heritage XL Food Waste Litter Bin

Award-winning manufacturer and designer of recycling and litter bins, Leaffield Environmental have announced a brand-new Heritage XL Food Waste Litter Bin. It is designed to assist local authorities with food waste collection in residential areas and residents taking food waste out to communal recycling areas. The entirety of the bin is made from a rotationally moulded double-skin construction. The front-facing access door is lockable and the bin has anti-fly-posting ribs on all four sides to deter unwanted posters and graffiti.
